INSTALLATION INSTRUCTIONS:

VENTING YOUR OVEN:

- 1. The purpose of ventilation hoods is to direct and capture smoke, grease-laden vapors, heat, odors, or fumes.
- 2. Low temperature equipment (maximum temperature 250°F/121°C) does not produce heat, odors, fumes, grease laden vapors or smoke and is not required to be vented.
- 3. Most jurisdictions consider our low-temperature ovens (maximum temperature is 350°F/177°C) as low-heat appliances not requiring vent hoods.
- 4. Installation must conform to local codes. The authority having jurisdiction of enforcement of the codes will have the responsibility for making interpretations of the rules.
